Project Timeline:

May 21- May 27: Set up a spring boot project, create a react application and create an ERD representation of the database.

May 28- June 3: Create a sign-up page and start working on Log in page.

June 4- June 10: Complete the login page with forget password functionality and start on creating a workplace.

June 11- June 17: Create a workplace and work on the feature of adding members to the workplace and updating workplace details.

June 18- June 24: Complete the workplace features and create a board inside the workplace and delete the board feature.

June 25- July 1: Create tasks in form of cards and work on the feature of assigning a task to a particular member belonging to workplace.

July 2- July 8: Work on the data field of task/cards including changing the status and setting the date of compilation.

July 9- July 15: Work on the search feature for task cards.

July 16- July 22: Complete the search feature for task cards and start on the filter feature.

July 23- Aug 1: Complete the filter feature and test all the features of the software and make sure it is working.
